SUMMARY

B.Tech student in Artificial Intelligence (AI) and Data Science with knowledge of software development, web design, and User Interface/User Experience (UI/UX) practices. Has a foundation in database management and programming languages, and experience in team coordination. Seeking a role that uses these technical skills.

TECHNICAL SKILLS

Programming: Python, C, C++

Databases: Oracle SQL (Structured Query Language), Relational Database Management

Design and Frontend: UI/UX Design, Web Designing, HTML (HyperText Markup Language) and CSS (Cascading Style Sheets) fundamentals

Core Competencies: Software Development, Project Management

Soft Skills: Professional Communication, Team Collaboration, Stakeholder Coordination, Relationship Management, Time Management, Adaptability, Analytical Problem-Solving

EXPERIENCE

Full Stack Developer Intern, Skill Intern | Currently pursuing

- Learning front-end and back-end web technologies.
- Taking part in database structuring, code optimization, and server-side logic setup.

Web Designing Intern, Top Skill Academy | Completed

- Gained practical experience in front-end design, user layouts, and website structuring.
- Collaborated on responsive web pages built with modern UI design tools.

EDUCATION

B.Tech, Artificial Intelligence and Data Science, Surya Group of Institutions | 2023 – 2027 (expected)

CERTIFICATIONS AND COURSES

- C, C++, and Python Programming (6 months), Coders Academy: object-oriented programming and logic building
- Oracle Database Course (4 months), Oracle Certified Training: database design and SQL queries
- Web Designing Course (1 month), Top Skill Academy: modern web design and UI practices
